

Pine Seedling

INCUBATED pH = 3.0 - 4.2

This lime-free product was developed for uniform germination and production of evergreen seedlings, particularly pines. The professional grade peat moss is specially processed to eliminate sticks while maintaining good aeration and drainage.

ADVANTAGES

- Maintains good aeration and drainage.
- No sticks.
- Easy to fill propagation trays.
- Keeps the root ball vigorous for better take off.

USE

Ideal for evergreen seed germination in deep cell plug trays (forestry trays).

CROPS

Conifer seedling production (pine, spruce, fir, etc.).

INGREDIENTS

Premium selected professional grade peat moss, coarse grade perlite, coarse grade vermiculite, non-ionic wetting agent, specifically designed starter charge with CRF.

Bag Size Available	ft ³	liters
