

Natural Fiber - Wood

INCUBATED pH = 5.4 - 6.2

Contains an eco-friendly, sustainable wood-fiber aggregate that mixes perfectly with peat.

ADVANTAGES

- Offers high water retention combined with rapid air diffusion for very rapid root development.
- Stable and uniform for the most consistent crops.
- All organic and compostable with smaller environmental footprint than coir, perlite and vermiculite.
- Highly compressible for bigger volume yields in compressed formats.

USE

Can be used for a wide variety of greenhouse container crops.

CROPS

Vegetables, bedding plants, specialty annuals, poinsettias, lilies, cut flowers and many more.

INGREDIENTS

Premium selected coarse grade peat moss, coarse grade wood fiber, dolomitic and calcitic limestone, non-ionic wetting agent, standard fertilizer starter charge.

Bag Size Available	ft ³	liters
Compressed	3.8	107
Big Bag Loose	75	2 124
Skyscraper Compressed	110	3 115

CUSTOM BLEND

All product lines can be adapted. We can build a custom formulation specifically for your needs.
