

## All-Purpose HP

INCUBATED pH = 5.4 - 6.2

With higher perlite content, this version of our renowned BM6 series is designed to provide additional drainage and aeration.

### ADVANTAGES

- Higher drainage capacity for crops demanding quicker dry-down periods and less water retention in the root environment.
- Forgiving mix.
- Reduces plant stress due to excess water.
- High air diffusion.
- Rapid root growth for healthy plants.
- Good particle-size distribution for uniform growth.

### USE

This general-purpose growing medium is ideal for colder, low-light times of the year when water management is more critical and for dry-loving plants that do not do well in more humid environments.

### CROPS

Poinsettias, Easter Lilies, root sensitive crops and many more.

### INGREDIENTS

Premium selected coarse grade peat moss, coarse grade perlite, dolomitic and calcitic limestone, non-ionic wetting agent, standard fertilizer starter charge.

Bag Size Available	ft <sup>3</sup>	liters
Loose	3	85
Compressed	3.8	107
Big Bag Loose	75	2 124
Skyscraper Compressed	110	3 115

### CUSTOM BLEND

All product lines can be adapted. We can build a custom formulation specifically for your needs.
