

Natural Fiber - Euro HP

INCUBATED pH = 5.5 - 6.5

Aggregate-free mix in which the large particle size of the peat moss provides aeration and porosity.

ADVANTAGES

- Approved for organic production.
- Premium select super coarse peat provides a physical environment similar to that offered by aggregates.
- Rapid and uniform plant development.
- Completely organic.
- Easy to use in any growing conditions.

USE

Potted plants, large containers, long-term crops.

CROPS

Long term vegetable production, large container tropical plant production, holiday crops such as poinsettias and lilies. Hydrangea production.

INGREDIENTS

Premium selected super coarse grade peat moss, composted peat moss, dolomitic and calcitic limestone, organic wetting agent, pelletized natural fertilization.

Bag Size Available	ft ³	liters
