

All-Purpose HP

INCUBATED pH = 5.5 - 6.5

With higher perlite content, this version of our renowned BM6 series is designed to provide additional drainage and aeration.

ADVANTAGES

- Approved for organic production.
- Higher drainage capacity for crops demanding quicker dry-down periods and less water retention in the root environment.
- Forgiving mix.
- Reduces plant stress due to excess water.
- High air diffusion.
- Rapid root growth for healthy plants.
- Good particle-size distribution for uniform growth.

USE

This general-purpose growing medium is ideal for colder, low-light times of the year when water management is more critical and for dry-loving plants that do not do well in more humid environments.

CROPS

Vegetable and herb container production.

INGREDIENTS

Premium selected coarse grade peat moss, coarse grade perlite, composted peat moss, dolomitic and calcitic limestone, organic wetting agent, pelletized natural fertilization.

Bag Size Available	ft ³	liters
Compressed	3.8	107

CUSTOM BLEND

All product lines can be adapted. We can build a custom formulation specifically for your needs.
