Berger – An Extension of Your Business

Berger's dedication to your success goes beyond products; it's about providing you with a complete support ecosystem. We are proud to offer every customer a dedicated team of experts to supercharge your production.

WHEN YOU CHOOSE BERGER, YOU GAIN ACCESS TO:

- ✓ Your **personal sales representative** - your trusted go-to person for all your needs.
- ✓ The guidance of our **experienced Grower Advisors**. They're here to share their wealth of knowledge and help you achieve remarkable results.
- ✓ **Laboratory & Technical Support teams** for agronomic expertise, analytical services and technical assistance.
- ✓ **Equipment Consulting**: our experts can help you optimize the performance of your equipment according to your operations. Just ask!
- ✓ Our friendly **customer service agents** are ready to assist you, ensuring you get the support you need when you need it and helping you access all the expertise that comes with every bag of Berger's growing mix.

Reliable partner. Predictable results.

Growers around the world rely on Berger's high-quality growing media for their valuable crops. Every mix is blended with superior ingredients, providing unparalleled consistency and predictable results. Our wide selection of professional growing mix products can meet the most specific cultivation needs in any growing environment.

Moreover, all of our products are backed by Berger's decades of experience. We have rigorous quality control processes and we have implemented and continue to improve our own food safety program. This includes laboratory testing done in collaboration with solid external partners, allowing us to provide a food safety certificate of analysis (COA) with each FST load we deliver.

Additionally, we hold **ISO 9001 certification**, which ensures the quality and consistency of our substrates. Each production is accompanied by a Final Inspection Reports (FIR) to guarantee quality assurance.

Finally, we ensure that our products are safe for use in the CEA market, meeting the needs of various crops and growers.

Berger understands that scheduling and timing is crucial in the controlled environment agriculture sector.

Making sure growers have the material they need when they need it and giving them the ability to easily transition from one step to another within their unique production systems, growers can optimize their operation and potentially shorten their production cycle while obtaining an exceptional output.

Helping You Safely Feed the World

The known and recognized Berger quality control, coupled with our Food Safety Program allows us to offer products specifically adapted to the needs of the Leafy Greens producers.

✓ QUALITY CONTROL

Berger puts a lot of emphasis on the quality of its products. From raw material to packaged growing media, each production stage (harvesting, storage, processing, etc.) has its own range of testing requirements which enables Berger to make real-time adjustments in our factories, ensuring the consistency of our products.

✓ TRACEABILITY

Each bale or bag produced by Berger is identified with a unique serial number which can be used to fully trace each ingredient that was used for its production. We also retain samples for a full year after production, in case additional inspections are required.

✓ FOOD SAFETY PROGRAM

Berger offers FST (Food Safety Tested) products that are tested for human pathogens by a third-party laboratory. We also implemented thorough cleaning procedures which, combined with our strict quality processes and additional precautions, allow us to offer FST mixes that answer all your needs regarding not only performance, but also peace of mind.
